Picture Cards with the addition of words

With the Journey cards, Merlin awakens in us forgotten pictures from our earliest memories in which we expressed freely and powerfully our spiritual abilities. Merlin, in a fascinating meeting with the hidden and visible forces of the universe, reminds us a forgotten and rich dimension with no boundaries, in which magic is the way of life. Merlin looks with us at the 78 magic cards and reminds us who we really are.

Another friend from the world of cards by Itzik, creator of Spectra cards, Anibi, Duet, Yes/No and Angel, The Dolphin within me, Merlin – Messages and Insights, (available also in English and French), Mibi, Prisma, Animal, Neria, On the Stage, Steps, Focus, Sesamy and the book Touch of a Card.

Merlin – Suggestions of Exertion

- Think about a goal in your life which you wish to achieve (or invent an imaginary one). Choose visibly 4 cards. Build a developmental card story the last card of which will be one that represents the strengths and abilities needed by Merlin in order to achieve that goal. What are the difficulties he encounters? What powers does he use? Share each of these steps and where they are within you.

- Think about a group you belong to (family, work, etc.), choose visibly a card which represents the strength you bring to the group. Choose a concealed card which represents the strength you receive from the group. What is the strength? Share and receive feedback from the others.

- Choose a card which attracts your attention. Look at it closely. Go on a journey of meditation with that card. Let the magician within you to lead you on the wings of imagination (background music is recommended).

- Ask your heart for a message. Draw a card. Look for the message Merlin is passing to you.

- Think about some situation in your life. Draw 3 cards and notice the powers Merlin uses. Ask yourself if this ability exists within you and how it could help you with the first topic you thought about.

- Think about a topic in your life. Think about a word which arises in connection to the topic. Draw one concealed card. Create a connection between the word to the picture. Notice how both connect to the topic you chose. Choose a visible card which represents a developmental direction in connection with the topic. Look what advice Merlin offers you.

- While working with the cards, you can be helped by a word or work with the picture cards separately.

- Invent your own way to work with our cards.

Good Luck
