Eco208

***Econologic* Hand-held Shower Head**

Eco208 Hand-held shower head is one of a series of ecologic shower products offered by ***Econologic Systems*** – a leading manufacturer specializing in ecologic technologies with an emphasis on the ecologic viability of its products.

As part of a line of ecologic products, **Eco208** possesses characteristics aimed at saving water and energy while automatically enhancing the water pressure. In addition to achieving its environmental goal, **Eco208** provides an invigorating shower experience as well as providing a long lasting and maintenance-free service.

Preserves water resources,

protects the environment

and saves money!

Characteristics:

- Provides an energetic shower experience whilst saving as much as 50% in water and energy consumption, compared to standard shower heads
- Unique water spray mechanism based on the Venturi principle of air intake for water pressurization
- Enhanced water pressure
- Energy saving as a result of heating less water
- Construction from high quality ABS plastic
- Hard-wearing chrome plating for a luxurious finish
- Self cleaning mechanism: All water residues flow out of the shower head when the shower is stopped.
- Easily fitted on existing standard 1/2" flexible pipe
- Dimensions: 250 x 70 x 30 mm
- Durable and long lasting
