TECHNICAL FEATURES OVERVIEW

morbidelli x200/x400
nesting machining centres for drilling and routing

The new generation of 3, 4, 5 axes CNC nesting centres for drilling and routing.
Models are also available in cell version with both automatic loading and unloading belt.

"eye-M" console with integrated PC, industrial PC with multi-touch color display, 21,5" screen size, Full HD, positioned on a support base with displacement wheels, for an easy handling of the mobile console along the machine perimeter.

*Faster machining cycles thanks to **FAST** tool changer with up to 18 positions.*

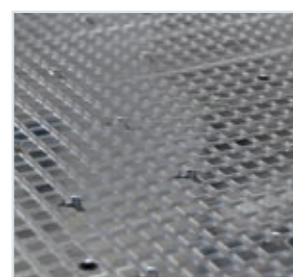

*Tools are immediately available thanks to the **R16** rear tool changer.*

- **Total flexibility** with an operating group configurability unique to the market.
- **60% of time saved** on drilling cycles with the new drill-bits designed to guarantee the best effectiveness on all types of material and any style of construction.
- **Reduced maintenance**, thanks to the **RO.AX** (Rotoaxial spindle technology) drilling bits. Recommended only after more than 1000 work hours.

*All at your fingertips with the **TECPAD 7"** remote control with color touch-screen.*

*Sturdy, practical and resistant "**PHE**" (Phenolic High Efficiency) and "**HE**" (High Efficiency) work tables.*

Electrical cabinet integrated into the machine base including air conditioner.

*Fully safe machining, both in **PRO-SPEED** and **PRO-SPACE** version with the **bumpers safety system**.*

*Free floor space thanks to the **vacuum pumps** integrated in the machine base.*

***TRB tool changer** with up to 19 positions.*
