Game Instructions

Playing with

2 Players age 8-up

The Game Contains:

50 cards distributed as follows:

- 9 suits of number cards. In each suit there are 4 cards with the same number.

- 3 suits of senior cards, 4 cards in each suit:

- 2 Fireballs

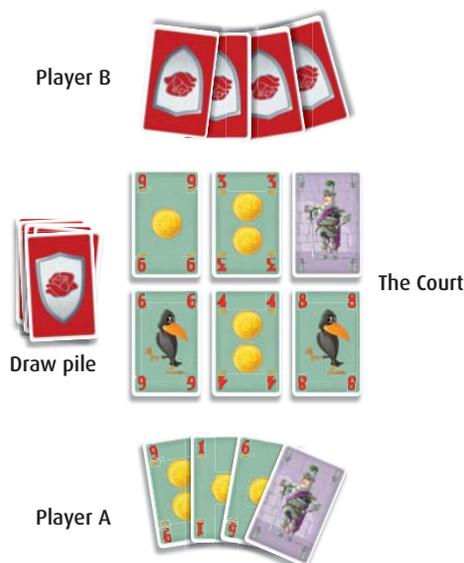

The Object of the Game

To collect as many cards as possible from the center of the table. (The Court).

How to Play the Game

Shuffle the cards and deal 4 cards to each player. To form the Court, draw 6 more cards and place them face up in the center. Leave the remaining cards as a draw pile next to the Court. If two or three of the same suit appeared in the Court, stack them on top of each other and they will be captured together. If all four cards of the same suit have been opened, collect all the cards, shuffle them thoroughly and deal again.

The game is played in several rounds. In each round, the player with the highest number card in his hand starts. If both have the same high number the younger player starts. In his turn, a player draws another card from the draw pile to have a total of five in his hand from which he must choose one to play with. In his turn the player tries to capture cards from the Court with cards from his hand by making a match between the two: Number cards capture number cards of the same number, (7 captures 7, 3 captures 3 etc.) and senior cards capture the same senior card. (A King captures a King, a Castle captures a Castle and a Knight captures a knight). The **Fire Ball** is a wild card that captures all the cards in the Court. A player who can make a capture, places his card on the matching card in the Court to show the similarity and then collects both cards and places them on the table in front of him. Coin cards and Raven cards are piled up separately and senior cards are spread separately as shown in the picture:

If a player cannot capture any card he must still discard one card from his hand and place it in the Court. (Note that the number of cards in the Court changes all the time.)

End of the round

When the draw pile runs out the players keep playing from their hands without replenish until they both discard all the cards in their hands and the game ends.

Bonus cards

If there are still a few cards in the Court at the end of the game, they go to the player who made the last capture.

Ravens Share

When the round ends the players count their Ravens and if one player has more Ravens, he is allowed to "steal" 2 gold coins from his opponent. After this, the players count the points they scored in the round

Scoring:

- For each gold coin – 1 point
- For 2 of the same senior card – 2 points.
- For 3 of the same senior card – 5 points.
- For 4 of the same senior card – 10 points.

End of the game

Play a few rounds and sum the points of the players in each round. The game ends when at least one player reached or passed a total of 101 points and the winner is the player with most points

Have fun
