

EWC-8010

⚠ ATTENTION: Read the instructions prior to installation.

1 POWERING UP THE QI CHARGER

Power-up the Qi Charger by inserting the included Micro-USB power and data cable into the power port. Insert the included USB cable into QC 2.0 USB power supply and plug into the wall (not included).

2 CHARGING YOUR DEVICE

Place your Qi compatible device on the charging pad to begin charging. A phone's charging spot is typically indicated on the device's screen during charging (and typically in the center of the device). The charging area of the charger is in the center of the circular surface.

3 FINDING YOUR CHARGING SPOT

If you cannot find the phone's charging spot, keep your device centered on the pad horizontally. Move your device forward or backward slowly until your device starts charging. If the device does not start charging, continue to move your device slowly forward or backward, stopping for 2 seconds every ¼ inch (or 5mm).

TROUBLESHOOTING

Ensure that no metal objects or metallic material interferes with wireless charging. If your case or back cover accessory contains metal material, please remove before charging. If your phone does not stay put on the circular charging surface, ensure that dust and debris are removed from the silicone circular surface. Remove by brushing away with a cloth or using scotch tape to pull out all debris.

Specification

Input: 5V/2A, 9V/1.67A
Output: 5V/1A, 9V/1.1A (Max. 10W)
Charging Distance: ≤ 8mm
Efficiency Ratio: 80%

Compatibility

Suitable for all Qi-enabled smart phone or other devices with a Qi receiver. WPC Certified

FCC STATEMENT

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which

can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Cleaning:

The product can be cleaned by a soft and dry fabric. Please do not use moisture, abrasives materials, solvents or any detergents which can be conductive
